Hello Commissioners,

The below correspondence was sent to your attention:

Dear Port Commissioners,

Please do not approve the Eagle Rock preferential relationship and resolution today. As an asthma sufferer, I know much too much about the dangers of particulate pollution and inadequate safety measures. I support WOEIP and the Sierra Club in asking that there be much more serious mitigation of potential threats to our residents' health and safety, and to the health safety of workers.

There is no hurry. It would be wise to take precautions before more people start wheezing, not afterward.

Thank you,

Naomi Schiff  
Oakland resident since 1973
