Project Description: (please use a separate page if necessary)

Schnitzer Steel Industries, Inc. (Schnitzer) plans to construct a stormwater improvement system at its Oakland, CA facility. The project is designed to enhance the current water treatment system for the site. Currently, stormwater, process cooling water, dust suppression, and wash water are directed into an existing 1.2 million-gallon holding tank, then to a clarifier, and then the water is either evaporated or reclaimed for process use. The new system will allow Schnitzer to further treat and discharge water previously evaporated and reclaimed. The new system includes electro-coagulation treatment, new water conveyance pipes, an upgrade to the existing water clarifier, and new storm and sanitary sewer connections.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
