

Instructions for Producing and Displaying AB2650 Placards

Attached are Word and PDF versions of the placards that would be used for identifying appointment trucks. A placard should be printed for each truck in your fleet that operate at the Port of Oakland. Each truck's license plate number should be pre-printed in the spaced labeled "License Number." The two remaining spaces should remain blank for printing. Placard should be printed or copied onto high visibility paper and laminated if possible.

Truckers should print in large legible lettering their appointment number / confirmation number and times (military) in the marked boxes with either a dry-erasable pen or grease pencil and display the placard on the driver's side dash or sun visor such that it will be visible to the terminal security guard / terminal personnel prior to arriving at the entrance gate and does not obscure the driver's vision.

*The following three letter codes may also be used as an identifier for the marine terminal.

APL: Eagle Marine Services
APM: Maersk/Sealand
TTI: Total Terminals International
STS: STS 7th Street
TBT: TransBay Container Terminal
TRP: TraPac
SSA: Stevedoring Services of America
