ADDENDUM No. 1

Bid No.: 21-22/39 – End Dump Trailer

This Addendum modifies the original Bid Documents for the above referenced Bid. Acknowledge receipt of this addendum in the space provided on the Bid Form (Attachment 2). Failure to do so may disqualify your bid.

The following questions were submitted prior to the deadline and are answered in this addendum:

1. **Question:** I would like to get some clarification on a couple of items in your bid request. We built a trailer for you in 2002, SN#021468. Are you looking to duplicate that trailer?

a) Item #3 - You call out AR400 Brinell rated Relalloy steel 3/8" thick. Our industry standard is now Hardox AR500TUF steel. Much stronger.

Answer: Hardox AR500TUF steel is an acceptable substitute.

b) Item #9 - Clarification on the style of rear suspension. Are you asking for an air suspension with a lift axle? The last trailer we built for you had a Hutchins single point spring suspension. We still use this same suspension today as our standard.

Answer: Hutchins single point spring suspension is acceptable.

c) There is no spec for the tires and wheels. The last one had white steel wheels and 22.5 tires.

Answer: 22.5 tires and Black Steel Wheels to match the End Dump color.

d) Item #17 - 2 speed landing gear – your last trailer didn't have this. You had a removable body stand. This size and style of draft arm will not accept the 2-speed landing gear. We have changed this to be hinged so it is always with the trailer.

Answer: This is acceptable.

There are no other questions to Bid No. 21-22/39.
