PRESIDENT  
SUPERVISOR, FIFTH DISTRICT

## BOARD OF SUPERVISORS

January 13, 2023

Secretary Toks Omishakin  
California State Transportation Agency  
400 Capitol Mall, Suite 2340  
Sacramento, CA 95814

**RE: Support for Port of Oakland Terminal Modernization and Arterial Roadway Improvements – 2022 Port and Freight Infrastructure Program**

Dear Secretary Omishakin:

On behalf of the Alameda County Board of Supervisors, I am pleased to express my support for the projects submitted by the Port of Oakland (Port), for a transformative suite of terminal modernization, zero emissions equipment upgrades, and supply chain efficiency investments throughout the Oakland Seaport complex. Through the California State Transportation Agency's (CalSTA) Port and Freight Infrastructure Program (PFIP), the state of California can continue to partner with local agencies and supply chain partners to advance infrastructure initiatives that will support job growth, economic development, and decarbonization efforts at Northern California's preeminent maritime trade gateway.

The Port is one of three principal gateways for containerized cargo on the West Coast of the United States. Together with its supply chain and business partners, the Port directly and indirectly creates more than 84,000 jobs in the region and supports over one million jobs across the United States. The Port plays an essential role in the state and national economies. It serves as a critical global gateway for the vast and diverse Northern California Megaregion, including agricultural exporters in the Central Valley and businesses relying on key import deliveries through Oakland.

The Port has proposed a suite of sustainable transportation projects that will modernize and upgrade its marine terminal infrastructure throughout the seaport, in addition to supporting the Port's decarbonization efforts through the introduction of zero-emission cargo handling equipment and charging infrastructure. Additionally, the Port seeks to advance several arterial roadway access improvements to minimize freight congestion, increase safety, and reduce trucking-related impacts on neighboring communities and residents.

These projects will improve the state's supply chain's overall efficiency and strengthen the Port's role as an international goods movement gateway serving importers and exporters throughout the Megaregion. In addition to fulfilling the supply chain enhancement goals of the PFIP, these

projects address important objectives related to the environmental impact, economic development, safety, and resiliency of the Port's operations.

The proposal will advance and demonstrate the reliability and market competitiveness of zero-emissions cargo handling equipment and support a wider adoption of this equipment throughout the entire freight community. The deployment of heavy-duty EV charging infrastructure serving maritime terminal users is among the highest priorities identified by West Oakland community stakeholders, including community leaders that served as the co-chairs of the Port of Oakland's 2020 and Beyond Air Quality planning effort. This initiative was also identified as a top near-term priority implementation item in the AB617-enabled West Oakland Community Air Action Plan ("Owning Our Air").

We appreciate your continued commitment to an efficient and sustainable international trade and transportation network and thank you in advance for your consideration of our support for the Port's request.

Sincerely,

A handwritten signature in black ink that reads "Keith Carson". The signature is written in a cursive style with a large, stylized "K" and "C".
