

Request for Proposals (RFP) for Consultant Support for Berths 55-59 Wharf Upgrades

The Port of Oakland ("Port") is soliciting proposals from qualified consultants for the development of a design and preparation of construction documents for upgrades to the existing wharf system (wharf structure, substructure, bollards, and fenders) at Berths 57-59 (with an option for Berth 55-56) to allow for the mooring and berthing an ultra-large container vessel ("ULCV").

Consultant's services shall include, but is not limited to, reviewing existing documents, performing an inventory and condition assessment survey of the existing wharf system, determining the capacities of the existing wharf system, providing design recommendations for upgrades to existing wharf system, providing a design for new bollards and fenders that can accommodate an ULCV, preparing plans, specifications, and estimates for use in the procurement and construction (installation) of the new bollards and fenders, providing as-needed engineering support during the bollard/fender procurement and installation phases, and developing operating limits for the new bollards and fenders in accordance with ASCE 130 Waterfront Facilities Inspection and Assessment Manual and the California Building Code Chapter 31F (MOTEMS) for these facilities.

The Port has posted this Request for Proposals (RFP) in digital format on a hosting website that can be accessed via the 'Current RFP's/RFQ's: Engineering Consulting Services' link at the following URL: <http://www.portoakland.com/business/bids-rfps/rfq-engineering/> or by clicking [here](#).
